

## IS382

### Outdoor passive infrared detector

- 
- 40 m wide angle detector for the most exacting applications
  - ATD adaptive threshold decoding for ambient condition evaluation
  - Comprehensive protection concept against all extraneous influences
  - True temperature compensation
  - Continuous function surveillance

**Versatile in application.** The IS382 is suitable for use in outdoor environment. The integral mounting bracket allows alignment of the detector in any position. Switches permit easy and quick set-up.

**Effective.** This detector may be used in standalone manned intrusion detection systems or as part of a sophisticated video surveillance system. Applications include fenced or restricted areas like military camps, detention centres, government facilities, industrial sites, and private premises.

**Highly professional.** Uniform high sensitivity is achieved through special focused mirror optics and microprocessor-controlled signal analysis. Adaptive threshold decoding for feedback of ambient conditions and true temperature compensation ensure reliable detection. This comprehensive protection concept gives the detector outstanding immunity against environmental influences such as temperature fluctuations, rain, snow, electromagnetic fields and dazzling lights.
